# Round Four-Digit Numbers

Round 2,763 to the nearest thousand.

<p><b>Step 1</b> First, find the place you wish to round.</p> <p style="text-align: center;">2,763 ↑ thousands place</p>	<p><b>Step 2</b> Look at the digit to the right of the rounding place.</p> <p style="text-align: center;">2,763 ↑ digit to the right</p>	<p><b>Step 3</b> If the digit is 5 or greater, increase by 1. If the digit is less than 5, do not change the digit.</p> <p style="text-align: center;">2,763 ↑ 7 &gt; 5 so increase by 1</p>
----------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Since  $7 > 5$ , 2,763 rounds to 3,000.

Round to the nearest thousand.
